Reclamation - Storm Water - Pit**Interim Reclamation:**

Date Interim Reclamation Started: _____ Date Interim Reclamation Completed: _____

Land Use: _____

Comment: Project area is surrounded by pinyon juniper woodland and adjacent to an irrigation ditch and irrigated field. Revegetation within the interim reclamation is sparse and grazed. This will require monitoring during the 2019 growing season, and additional revegetation measures required if desirable cover is not increasing. Livestock exclusion may be needed for successful vegetation establishment and long term stabilization.
