A construction crew was excavating the pipeline in preparation of replacing the damaged section during this inspection.</p> <p>The release point had reportedly not been discovered at the time of this inspection. The 3" fiberglass pipelines were observed to be drooping as they came out of the 12" casing sleeve and between the sandbag supports.</p> <p>Impacted material was being stockpiled alongside the excavations. The operator shall ensure that the excavated material and contaminants do not migrate.</p>	hughesjo	12/21/2018
