The elevation of the derrick floor above sea level is 7567 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Exploratory strat hole. This test well is to be drilled for stratigraphic and structural information to an approximate total depth of 1000'. Objective marker bed is the Morapos sand member of the Mancos shale expected at approximately 1000'. After running a correlation electric log, the well will be properly plugged and abandoned. No important water or oil or gas formations are expected to be encountered.

081-40020

CONSERVATION COMMISSION

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Anderson-Prichard Oil Corporation

Address B-400 U. S. National Bank Building
1740 Broadway

Denver 2, Colorado
