Comment

Vegetation in Interim Reclamation areas appears well established, though dormant growth season & snow cover prevented detailed assessment. Senesced / dead, Noxious weed, Halogeton & debris weed Kochia were noted in areas along pad perimeter. Recommended to monitor & control weeds in 2019 growing season.

Drains	Pass					

Comment: Erosion is occurring on & sediment migration off of Cut slope. This Site has an Approved 2A, Amending Location with Date planned to commence construction: 05/01/2019. Construction drawings and staking observed on Cut slope indicate that site will be enlarged in this direction, establishing new cut slope area. If new construction is commenced in spring 2019, stabilization of slope can be incorporated with construction activities. Pad surface could use more gravel; rutting was noted. Refer to photos attached.

Corrective Action: Install or repair required BMPs per Rule 1002.f., stabilizing Cut Slope by 6/17/2019.
