Comment

This location is not in compliance with Rule 1003 standards. Operator has failed to perform interim reclamation to reduce disturbance areas only needed for production operations. Appears an area along the southwestern location can be further reclaimed per Rule 1003 standards. Refer to the attached inspection photos.

Also, there was stormwater erosion observed along the western and southwestern location discharging off location. See Stormwater section for correction actions and corrective action date.

Corrective Action

Comply with Rule 1003. The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.
