General Comment:

Environmental**Spill/Remediation:**

Comment: COGCC inspection of spill from production lines reported by Operator. Spill surfaced in area of subsurface dumphines downstream from separators. Spill occurred in area of unused piping installed for future expansion, but not isolated from current production. Operator onsite indicated that 6" produced fluids oil line loses pressure (200 psi over 30 minutes). Pinholes were found on this line. Current plans are to isolate this section of piping, and pressure test remaining lines that remain in production with a plan to return site to production and allow abandonment of piping thought to be source and resume excavation of impacted soil. Operator will followup with additional pressure test and excavation results on Form 19 Supplemental Reports.

Corrective
Action:

Date: _____

Emission Control Burner (ECB): _____

Comment:

Pilot: _____

Wildlife Protection Devices (fired vessels): _____
