Re: Schmidke Lease
Walton Lease

Dear Sir:

Our records show that your firm began production on the above captioned leases, in the Surveyor Creek Field, on 12/24/58 and 12/30/58 respectively. However, the well files for these two wells show that they were drilled, completed and then shut in by the Denver Basin Oil Company. If your firm is now the operator of these wells instead of Denver Basin we should have on file an OGCC Form 10, showing the change in ownership. We do not have such a form on file for these wells.

I am enclosing these forms for you to fill out and return to this office. If you are not the operator of these wells and there is some other explanation, please, explain. The form 10 should be sent in each time there is a change in ownership involving an oil or gas lease. Please refer to the instructions on the back of the form.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

James A. McKee, Assoc. Petroleum Engineer
