REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

A hydrovac was used to remove all visual contamination. Soil samples will be taken to determine the extent of contamination. Excavation will be done once equipment is out of the way.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A hydrovac was used to remove all visual contamination. Soil samples will be taken to determine the extent of contamination. Excavation will be done once equipment is out of the way. We are unable to remove equipment at this time. Hand augering for soil samples will be collected for delineation when the ground thaws by 6/1/2019,
