**General Comment:**

This is a follow up inspection from Doc# 689302664. Required Corrective Action (s) items noted in previous inspections have been satisfied.

Equipment inventory has not changed on location.

While in the process of doing the routine follow up inspection, I came found a substantial amount of Condensate on the ground from a release near the separators. I called the emergency number @ 1235 and told her what I found. I received a return call from Mike Gardner at 1245, Mike informed me that he was sending a supervisor to location to start the clean up process.
