Chisholm, Jim	405-642-9437	investmentequipment@gmail.com	All Inspections

General Comment:

Environmental inspection related to Rem #12431, former oil skim pit and production pit (110639) closure. Additional hydrocarbon impacted soil requires removal from the south wall of the excavation. Historic hydrocarbon impacted soil in the vicinity of the crude oil loadouts should be removed and disposed along with the oil skim pit excavation soil.

Environmental

Spill/Remediation:

Comment: Based on field observations, hydrocarbon impacted soil related to the former oil skim pit appears to have been adequately removed (pending laboratory analytical confirmation) with the exception of the south wall.

Corrective Action: Remove additional soil from the south wall and provide confirmation soil sample results on a supplemental eForm 27.
