The image shows an industrial wellhead for the Frank 14-31 well, owned by KerrMcGee Oil & Gas Onshore LP. The wellhead is a complex assembly of metal pipes, valves, and a large handwheel. It is situated in a dry, open field with a clear blue sky in the background. A red metal safety fence surrounds the wellhead. A blue sign is attached to the fence, providing contact information for emergencies. The ground is covered with dry grass and straw.
