

# NPR Solidification Facility

## [Centralized E&P Facility] Annual Report:

### 2018

#### 2018 SUMMARY

The NPR Solidification Facility, permitted as a non-commercial Centralized E&P Facility (426582) previously belonged to Encana, having been acquired by Caerus Piceance LLC on July 25th, 2017. The NPR Solidification Facility is in SENW Sec 29, T5S, R95W. During 2018, the facility was in use 4-5 days per week.

Volumes brought in: Solids-246.5 yards, Liquids-9,521 bbl.

Volumes hauled out: 2,783 cubic yards

Volumes hauled from the NPR Solidification Facility are taken to a commercial E&P facility permitted to accept the material (RNI Meeker Piceance Creek).

#### 2019 UPDATE AND FUTURE OPERATIONS

The facility continues to be in the Caerus field operating plan. In 2019, it is expected that the NPR Solidification Facility will continue to handle material and will be in operation between 2 and 5 days per week. Greenleaf Environmental Services has also been added as an approved Commercial Disposal Facility.

#### MONITORING WELLS AND WATER SAMPLING

There are roughly nine (9) permitted monitoring wells near or downstream of the NPR Solidification Facility. Water samples were collected at the following wells on the following dates. The NSF water data is included as an attachment.

14ST - 3/7/18, 5/15/18, 8/20/18, 12/6/18

15ST – 3/7/18, 5/15/18, 9/4/18, Dry 4<sup>th</sup> quarters

7MW - Dry all 4 quarters

8MW – Dry 1<sup>st</sup> quarter, 5/15/18, dry on 3<sup>rd</sup> & 4<sup>th</sup> quarters

9MW – 3/7/18, 5/15/18, Dry 3<sup>rd</sup> quarter, 12/10/18

#### INSPECTIONS, SPILLS, RELEASES OR ENFORCEMENT ACTIONS

There were no identified enforcement actions, inspections or spills at this facility in 2018.
