**General Comment:**

COGCC Environmental Inspection to determine the status of pit 118602. The pit location was determined based on historical documents and aerial imagery. COGCC personnel found no surface indication of a pit present in the location. Additionally Remediation #11462 submitted on 6/19/2018 indicated clean closure of a partially buried produced water vault in the area of the historic pit. The pit status has been changed to closed. Should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or remediation activities may be required.
