**OPERATOR COMMENTS AND SUBMITTAL**

Comments 

Laramie Energy utilizes the Trimble GNSS R1 receiver which provides professional grade positioning information. All as-built wellhead data was collected while using sub-meter corrections with the Satellite-Based Augmentation System (SBAS) which provides sub-meter accuracy in the field.  
The figure in the PDOP field is not the PDOP reading; it is the foot-accuracy reading.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
