COMMENTS:

Noble Energy respectfully requests continued TA status. The well is closed to the atmosphere via a CIBP set at 6700' on 2/19/2019. The well is closed to the atmosphere and locked out and tagged out at the master valve. The well was completed in the Niobrara-Codell formation. This well was TA'd for an off-set frac, PDC's BLANCA 12N Pad and is part of Noble's alternative MIT program. Noble will plug and abandon before the next MIT is due. Noble is currently working through a large back log of P&A work for offset mitigation work for DJ basin activity. Form 5A to change the status to TA was submitted on doc # 401994891. Initial pressure test is attached. Noble will run an MIT if the well is still TA'd after two years. This well is tagged with a yellow tag.
