CORRECTIVE ACTIONS:

1 CA# 123636

Corrective Action: Remove and properly dispose of oily waste, per Rule 907.e. Submit information regarding final disposition of fluids to the COGCC via a Field Inspection Report Response form. If fluids are determined to be the result of a spill or release from the production facility, submit an eForm 19 Spill Report per Rule 906.b.

Date: 04/12/2019

Response: CA COMPLETED

Date of Completion: 03/28/2019

Operator Comment: Fluids accumulated inside secondary containment. The fluids were predominately snow melt. Fluids were pumped out with a vac/pumper truck and disposed of at a licensed facility. This is typical for spring melt off. Snow/precip that has accumulated inside containment melts and is removed by pumpers as part of regular operations. No evidence of hydrocarbon release inside or outside of the containment. No evidence of spill or release from production facility.
