This office has not been notified of the drilling of these wells. As you are probably aware, from previous drilling experiences in this state, a notice of Intention to Drill should be submitted to this office for approval before any operations can commence. Failure to do so is in Violation of the Rules and Regulations of the Conservation Commission.

Please submit as soon as possible a notice of Intention to drill. In addition, the bonding requirements as explained in Rule 304 of the Rules and Regulations should be met.

A designation of agent is already on file with this office.
