General Comment:

This is a follow-up interim reclamation and stormwater inspection.
This inspection is to document compliance for the following corrective actions:

1003: Remove gravel and conduct additional reclamation.
1002.f: Stormwater

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

Comment

Previous inspection required operator to remove gravel from the interim areas and conduct additional reclamation activities on areas not progressing towards reclamation standards. Operator appears to have seeded and crimped mulch into the slopes on the west end of the location. Additional seeding appears to have been conducted on the north west corner of the location, however gravel/base has not been removed from the interim areas. This corrective action has not been addressed and remains applicable.

Corrective Action

Perform reclamation in accordance with COGCC 1000 series rules, remove gravel (and any remaining material not conducive to reclamation) and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 3/31/2019
