Following is a (notice of intention to do work) (~~REPORT OF WORK DONE~~)
 (~~REPORT OF WORK DONE~~) (patented) described as follows:

Colorado	Logan	Merino
State	County	Field
1	Kilmer	20 SE, SW, SW
(Well No.)	(Lease)	(Sec. and $\frac{1}{4}$ Sec.)
		6 N.
		(Twp.)
		5 1/4 W.
		(Range) (Meridian)

The Well is located..... 330..... ft. (N) of S. line and..... 990..... ft. (E) of W. Line
 of Sec. 20,.....
 (S) (N)

The elevation above sea level is 4251.40 ft. Grd.

Details of Plan of Work: (State names of and expected depths to objective sands; Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

We propose to drill a well using rotary tools in the Merino Prospect Field on the Couch Lease, the well to be known as Kilmer #1. The proposed well will be drilled to the Dakota formation.

It is expected that approximately 200 ft. of 10 3/4 inch, 8 Rd. Thd., 32.75 lb. casing will be run as the surface string and cemented to the surface.

It is estimated that the Dakota formation will be found at 5100 ft. below the kelly bushing. In the event a production string is needed, 5 1/2 inch, 8 Rd. Thd. 14 lb., J-55 casing will be landed at the top of the producing formation and cemented with sufficient amount of cement to conform with good engineering practice.

All measurements reported will be from the Kelly Bushing.

Approved: Oct 13 1950
