General Comment:

This is a Final Reclamation (FR) Inspection in response to a bond release request for well API# 123-29125. Sundry Document #2226036 stated that FR is complete and ready for inspection; however, the Operator has failed to perform final reclamation activities.

Well was plugged and abandoned 2/17/2015.

Comment:

	<p>This location is over 3 years out of compliance with Rule 1004. Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland. Well was plugged 2/17/2015. It does not appear any reclamation work has been performed throughout the access road and subsidence was observed at the wellhead. Weedy, annual vegetation was observed throughout portions of the access road which includes but not limited to Cheatgrass, Field bindweed, and Kochia. A separate Field Inspection Report was submitted for the associated tank battery. Please refer to the attached inspection photos for more detail.</p>	
Corrective Action:	<p>Perform reclamation in accordance to Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards.</p> <p>The corrective action date is the date when all final reclamation activities should have been completed.</p>	Date 02/17/2016
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
