**General Comment:**

On 5/8/2019 COGCC Environmental; Staff, Kris Neidel inspected location ID # 312924. The weather was overcast and 45 degrees, the ground surface was dry. The location appears to have been PA'd. No production equipment such as; tanks flowlines, treaters, etc remains on the surface. The access road remains, from county rd 184, to pad, continuing north to the river. The area that contained the production equipment and tanks appears to have been surface tilled or roughened. By 6/10/2019, the operator shall submit a Form 27, Site Investigation Workplan that demonstrates; all remaining soil is compliant with COGCC table 910-1. Field Inspection document number 685100489, dated 7/9/2018, contains a summary of past inspections that mentioned oil stained soils and spills, these areas shall be addressed in the Site Investigation Report. A review of the COGCC database showed a pit, facility id 116688, is associated with the Craig 1-7 well. Status of this pit is unknown, a Separate Form 27, shall be submitted by 6/10/2019 that demonstrates that the pit was closed per COGCC rules.

**Spill/Remediation:**

Comment:	Spills have been mentioned on the following COGCC inspections; 12/1/1996 (Document 500154562), 3/28/2000(Document 200006019), 4/5/2001(Document 200015671), 9/17/2002(Document 200033647), 11/17/2010(Document 200290822), 10/25/2013(Document 673400042), 9/8/2014(Document 673401077), 2/9/2015(Document 673401770), 3/16/2015(Document 673401907), 2/24/2016(Document 673402957), 6/14/2016 (Document 673403260), 5/2/2017(Document 673404536). Stained soil and spills were noted in the following areas; wellhead, pipe connections, pumping unit exhaust, inside tank battery and an unknown area.		
Corrective Action:	A form 27 should be submitted that outlines the plan for the removal of all remaining impacted material and demonstration that remaining soils comply with COGCC table 910-1.		Date: 06/10/2019
