Storm Water:

Comment: Erosion is occurring on SE corner of cut slope & sediment is migrating onto site, vehicle rutting is evident in this this corner behind equipment. The cut slope and rutted pad surface needs to be stabilized. Un-reclaimed area at north side of site appears to be collecting sediment from Pad, contributing to site degradation. Sediment is migrating off site from NW corner BMP. Repairs should be incorporated with installation of Interim Reclamation. Refer to Photo Log attached.

Corrective Action: Install or repair required BMPs per Rule 1002.f.

Date: 06/14/2019
