Weeds present **Fail** Subsidence _____

1004.d. FINAL VEGETATION TRANSECT
 TRANSECT RESULTS OF DISTURBED AREA% _____
 TRANSECT RESULTS OF REFERENCE AREA% _____
 TOTAL % OF DESIRABLE VEGETATION COVER _____
 VEGETATIVE COVER _____

Comment:

Operator has performed final reclamation activities in response to the previous complaint. Germination was observed throughout most of the location; however, there are bare patches with no germination. It does not appear the Operator has performed weed management as weedy vegetation was observed throughout the location. COGCC staff previously communicated that it is the responsibility of the Operator to comply with Rule 1004 vegetation standards, including weed management. Operator will have to perform additional reclamation activities this Fall to address bare patches and any other areas that have not had successful germination of desirable species. Refer to the attached inspection photos.

Corrective Action:

Perform weed management immediately and no later than June 21, 2019. Also, submit any monitoring data by June 21, 2019 demonstrating the Operator has been monitoring the location.

Date **06/21/2019**
