13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Chevron, as operator of the RWSU is planning to install a new produced water injection line to SB Lacy 11Y disposal well. A single 3" fiberglass line will be laid approximately 1022 ft. The existing producing line will be disconnected, flushed with fresh water, and capped on both ends. The new produced water injection line will be buried at a minimum depth of 42 inches to the top of pipe. (see attached map and emailed shapefile).
Approximate acres of total disturbance: 0.9 acres
