Spills:					
Type	Area	Volume			
Produced Water	Flow Line				
Comment:	spill 455229 reported by previous operator. suspected impacts from spill or remediation/reclamation efforts appear to remain at site with no cause of stunted crop growth known at this time.				
Corrective Action:	Develop a site investigation plan to determine cause of issues noted at site. Incorporate COA's yet to be specified by COGCC reclamation group in this site investigation plan. As part of site investigation the landowner must be contacted to discuss crop loss issues and consulted with on any remediation efforts. Submit form 27 describing proposed site investigation within 45 days. Initial plan may be revised through supplemental form 27 as information is gathered.				Date: 08/12/2019

In Containment: No

Comment:

spill 455229 was originally reported on 05242018 as having been discovered on 05/22/2018. An aerial image can be found on Google Earth with a capture date of 05312018. A annotated version of that aerial image is attached to this inspection. A near circular excavation area can be seen on the image and is labeled as spill excavation. Photos showing limited crop germination and growth in an approximate 100 foot by 30-50 foot area can be seen in two photos taken at the time of this inspection and these photos are attached

☐ Multiple Spills and Releases?**Venting:**
