#### COMMENTS:

SandRidge will be adding perfs in the Frontier formation. To safely conduct this action SandRidge will utilize a temporary frac tank on location containing 13.2 ppg "kill" fluid used to contraol the well safely during the intial and final steps of this action. The tank will be set in temporary lined containment (duck pond containment). This equipment is standard with such an action. Duration of tank on location is requested for 60 days.
