

Huber #3-24

Corrective Actions Taken on the Huber #3-24 for the COGCC compliance
INC.

Huber #3-24
07/01/19

Storm Water management controls have been established to stabilize erosion along western edge of access road. Check dams and diversions were installed to control water run off from location.

View of access road looking north.

View of check dam and diversion looking south.

Hello Allison,

Could you upload the following email correspondence to the well file for the 067-08295 API Number and location?

The email is correspondence about our response to an inspection. I was wondering if instead of labeling it generally as correspondence, we could label it more specifically as: **"Correspondence for Inspection 680600085"**?

Here is the information from the card:

Name and Date: Catherine Roy/September 21, 2015

Projects: **XTO Correspondence for Inspection 680600085**

Facilities: Well Location

Other:

Enter in Database? Yes

Needs Scanning? No

Index Doc? I'm not sure

Return to Office: No

File in Public Room? No

Thank you very much!

Subject: 067-08295 Junk and Debris on Location

Mr. Hixon,

I spoke with Denise Arthur about your request regarding woody debris on the 067-08295 location. She indicated that we can allow the surface owner to continue to use a portion of the interim reclamation area for woodcutting. However, it is our expectation that you will communicate with the surface owner that the disturbance should not get bigger than it currently is with one or two small woodpiles somewhat neatly stacked. In addition, we recommend that the vegetation that was disturbed by the wood cutting, shown in Photo 1 of inspection number 680600085 be re-seeded and new disturbance to this area kept to a minimum.

I will have this correspondence uploaded to the well file for this location to document that the current condition of wood piles are "Satisfactory" and XTO is in compliance with the required actions outlined in the 680600085 inspection pertaining to removal of junk and debris from the location. As we discussed, XTO will still need to comply with the corrective action to repair stormwater erosion along the access road at the location.

Thank you,

Catherine Roy
