General Comment:

COGCC joint inspection with Environmental Protection Specialists S. Arauza and J. Heil along with Western Integrity Inspector R. Murray. Follow-up to Spill/Release ID #464855.

Operator reported discovery of a flowline leak resulting in a release of an unknown volume of condensate and produced water on 6/3/2019. On inspection date, an open excavation remained in SE corner of pad near production equipment. No hydrocarbon odors or staining were observed inside of the excavation during inspection. Soil that was stockpiled west of excavation did not exhibit hydrocarbon odors or staining.

Tank battery contains one (1) 120 bbl produced water AST inside of lined, metal secondary containment. No holes or tears were observed in visible portion of tank battery liner on inspection date. Tank battery secondary containment had approximately 1" of fluid inside on inspection date (likely precipitation). Fluids did not exhibit hydrocarbon sheen or odor.
