The CM Production Oliver Warren site equipment decommissioning, removal and salvage task is under way. The Oliver Warren site is the production facility for (1) remote well. Facility consist of (4) 300 BBL tanks, vertical separator with metal shed, and water/oil flow lines/risers. The remote wellhead has a pumping unit with electric prime mover and associated electrical supply equipment.	stjohnw	07/07/2019
Work at site today focused on continuing to clean oil production tanks. The entry hatch was removed from P3 to finish pressure washing tank interior. The entry hatch and flame tube were prepped for removal on P2 to allow interior of tank access for pressure washing. The entry hatch for both tanks were reinstalled for overnight protection. Cleaning of P3 is complete. Pressure washing P2 was not completed.
