270438	WELL	SI	01/29/2014	OW	121-10714	CANNON 33-24	TA

**General Comment:**

This is an orphaned well inspection. Inspection completed to document progress and completion of equipment decommissioning and removal.

Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program.

See link at end of report for path to downloadable pictures.

**Inspected Facilities**Facility ID: 270438 Type: WELL API Number: 121-10714 Status: SI Insp. Status: TA**Idle Well**Purpose: ☐ Shut In ☒ Temporarily Abandoned Reminder: \_\_\_\_\_

Comment: Well is an Orphaned Well Program well. Flow line disconnected from wellhead. Valves at wellhead are closed and bull plugs installed. Equipment decommissioning, removal and salvage is in progress.

Corrective Action: \_\_\_\_\_ Date: \_\_\_\_\_

**COGCC Comments**

Comment	User	Date
The CM Production Cannon Site equipment decommissioning, removal and salvage task is under way. The Cannon site is the production facilities for (4) remote wells. The Cannon 33-24 is one of the remote wells.	stjohnw	07/07/2019
Work on the remote wellhead location consisted of loading pumping unit and associated parts on flatbed trailer for haul off. The loading work then moved to the production facility where the concrete (busted up sump) and wood debris were loaded on a side dump for haul off. Waste manifest OGC19602.
