**Date:** Thursday, June 6, 2019 2:32:05 PM

---

Hi Michael (and John) - The plugging date should be the cut and cap date and the clock starts there. We actually got 6S submissions where the well was not yet cut and capped and to your point, monitoring during that time may indicate some issue possibly requiring further action – so the well wouldn't be 'fully' plugged and abandoned.

Thanks for reaching out,  
Diana

**Subject:** Form 6 Subsequent Dates

Diana,

I wanted to get a little clarification on something. Because we are monitoring our wells for a minimum of 5 days before we move to cut and cap the wellbore, we've been running of the assumption that this date is the final plugging date, and the Subsequent Form 6 is due 30 days after the cut and cap. Is this how you interpret this deadline too, or do we need to change our procedure?

Thank you,

**Michael Schwarz**
