Comment Weeds appear to be controlled at this time. Revegetation is progressing within the outer reclamation areas. A dead animal observed within the well cellar which is full of water.

Corrective Action Well cellar is acting as wildlife entrapment. Install functional wildlife protection measures to prevent wildlife mortality.

Comment:		<p>Stormwater erosion is occurring in several areas along the access road. Stormwater controls that are in place are largely not adequate or properly installed. Cut banks, silt traps along access are not stabilized and continue to erode. Many culverts are installed above grade resulting in increased erosion at the outlets. Banks along roadside ditches are not stabilized.</p>				
Corrective Action:		<p>Stormwater controls need to be installed along the access using good engineering practices such as those described in CDOT manuals for erosion and stormwater control. Erosion along the access road needs to be stabilized.</p>				Date: 07/22/2019
