General Comment:**COGCC Inspection Report 689802865 Summary**

On Monday 6/03/2019 at approximately 12:20, I, Inspector Emily Waldron, conducted a field inspection at Sandridge Exploration & Production LLC Hebron Central Facility, at 413014 in Jackson County Colorado.

While there, I observed a an active production facility.

During this inspection the following possible compliance issues were observed:

Frack sand spilled on location. See photo 1, 2, and 3. If spilled, released or dumped onto ground surface follow material handling and guidance per MSDS or product data sheet. Submit document, procedures, and waste disposal manifest to COGCC field inspector by 7/5/2019.

Non-reportable spills - stained soil, some with fertilizer on top, present in multiple areas on location. See photos 4, 5, and 6. Control and contain spills/releases and clean up per Rule 906.a. Contact COGCC EPS staff, securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d, and comply with Rule 603.f by 7/12/2019.

Site degradation occurring. All location stormwater BMPs need maintenance. See photo 1. Install or repair required BMPs per Rule 1002.f by 8/2/2019.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report 689802865.
