Good morning,

Foundation has received the copy of the recent inspection on the State 36-3-9 location (Doc#682504574), and I wanted to let you know that the State 36-3-9 and the State 36-6 wells have been added to our 2019 Plug and Abandon list. I learned yesterday that they are tentatively scheduled for July abandonment. After which the location will be reclaimed in entirety.

I will work with Rick on the pit closure at the battery – looks like the eForm 15 is still in process pending Greg Deranleau's approval.

Is there a way to more officially document this information update? Our Notice of Intent to P&A will likely be submitted in a May/June timeframe.

Thanks so much for your help.

Alyssa M. Beard
