Corrective Action:	Previous inspections documented that the access road remained un-reclaimed and required Operator to perform reclamation. At the time of this inspection, the access road remains un-reclaimed. Refer to the attached inspection photos and Doc.# 682502938 for further photo documentation regarding the access road.	Date 07/08/2017
	The tank battery location fails to be reflective of reference crop areas as no crop growth was observed within the tank battery area.	
Comply with Rule 1004. Collaborate with the landowner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production. Corrective action date is being back-dated as the corrective action remains unresolved.
