SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Refer to COGCC Rule 906.b. for reporting requirements of spills or releases of E&P Waste or produced fluids. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Due to recent precipitation events, PDC discovered a reportable off-site release of water based drilling mud from the Becker #3 spread field. PDC is currently working to stabilize the area, repair/enforce damaged BMPs and recovery efforts are mitigating impacts.

How was extent determined?

On July 8, 2019, water-based drill cuttings were released off-site of the Becker Ranch #3 Spread Field due to a heavy precipitation event. The release area will be monitored over the next two months during vegetation regrowth. Confirmation soil samples will be collected from the release area and submitted for a reduced analyte suite based on the site-specific contaminants of concern (COC) identified during pre-release baseline soil sampling. All soil samples will be analyzed for pH, electrical conductivity (EC), and sodium absorption ratio (SAR).

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 07/17/2019

Cause of Spill (Check all that apply) ☐ Human Error ☐ Equipment Failure ☐ Historical-Unknown
☒ Other (specify) Heavy Precipitation Event

Describe Incident & Root Cause (include specific equipment and point of failure)

On July 8, 2019, water-based drill cuttings were released off-site of the Becker Ranch #3 Spread Field due to a heavy precipitation event.

Describe measures taken to prevent the problem(s) from reoccurring:

Material spreading and incorporation methods have been altered to help prevent over land flow of precipitation. Incorporation methods implemented will increase infiltration rates preventing elevated levels of overland flow and decreased erosion. The landowner will be consulted on any mitigation activities conducted on property owned. Best Management Practices (BMPs) down slope of the spread field have been repaired and reinforced to prevent future discharges. Scheduled storm water inspections and routine maintenance will continue.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) ☐ Offsite Disposal ☐ Onsite Treatment

☐ Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbbs): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: ☒ Corrective Actions Completed (documentation attached)

☐ Work proceeding under an approved Form 27
