General Comment:

This is an orphaned well inspection. Inspection completed as site visit in preparation for rig moving onto location for plugging and abandonment task.

Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program.

See link at end of report for path to downloadable pictures.

The Tudex Plugging and Flow line Abandonment Project is underway. The Brink S2 is one of the wells on the project to be plugged and abandoned. This is a site visit in preparation for moving rig onto the well location. Currently the location consisted of wellhead, old tank battery pit and fencing. No issues were noted at time of inspection that would prevent rig and equipment from staging and performing plugging task. It was noted that the drums, buckets, and plastic containers collected during production equipment decommissioning are inside perimeter fencing.	stjohnw	07/21/2019
