Type	WEEDS		
Comment:	<p>Due to the extent of noxious weed infestation found field wide. The operator must submit a weed control plan for ongoing weed control practice. A detailed weed control plan should include timing of control, identification of noxious weeds, method of control, product information, equipment utilized, and location of control. It is recommended to consult the local weed control agency and have a qualified weed control expert assist with developing a field wide weed control plan.</p> <p>Since the previous inspection, a plan was submitted but was inadequate. Operator was emailed to supply more information for a detailed weed control plan.</p>		
Corrective Action:	<p>Comply with Rule 1003.f.</p> <p>Provide a plan for ongoing weed control.</p>	Date:	08/01/2019
Type	WEEDS		
Comment:	<p>There are List B noxious weeds growing along the main road, access road, and location. Noxious weeds observed were Musk thistle, Canada thistle, and Houndstongue. Corrective action was not completed since previous inspection. Noxious weeds have now developed seed heads which must be cut, bagged, removed, and sprayed. See Attached Photos. Corrective action was not completed since previous inspection.</p>

COGCC Comments

Comment	User	Date
Musk thistle and Hounds tongue are biennial plants that produce leafy rosettes the first year of growth. Herbicide treatment should be performed during first year growth before they develop seed head during second year growth.	CostaR	07/22/2019
Operator submitted FIRR for corrective action completed. This inspection documents that corrective action was not completed. It appears the operator submitted false information.	CostaR	07/22/2019
