1003 f. Weeds Noxious weeds? F

Comment The southern portion of the project area is not needed for production operations and needs to be reclaimed. A vegetation transect was conducted and identified zero percent desirable vegetation cover. At this time it is supporting numerous ruderal weeds such as cheatgrass, kochia, and jointed goatgrass (~1000). Jointed goatgrass is a County-listed noxious weed.

Corrective Action Control jointed goatgrass infestation in a manner that prevents seed dispersal by July 31, 2019. If seed is mature and dispersing in 2019, then subsequent treatments are required in spring 2020.

Reclamation needs to be conducted within portions of the project area not in use for production operations. This needs to be conducted within the 2019 seeding window and no later than November 1, 2019.
