General Comment:

This is a follow-up final reclamation and stormwater inspection to inspection #682501418 dated 10/21/2016, #682503090 dated 1/17/2018, and #682503397 dated 6/1/2018.

This inspection is to document compliance for the following corrective actions:

1004: Final reclamation on the pits.

Any corrective action(s) from previous inspection(s) that have not been addressed are still applicable.

Comment:

Previous inspections documented (via vegetative transects) that pit location does not meet reclamation regulations. Inspections required operator to comply with 1004 and conduct additional reclamation activities on the pits.

Operator has not submitted documentation or notice that work has been conducted per the CA, additionally, unable to find evidence that additional reclamation activities have been conducted. Areas of the pit on the north end of the facilities location, and pit walls on the south end remain evident; walls remain bare or vegetated by undesirable weedy plant species not reflective of the reference area.

Original corrective action and corrective action date remains applicable.

Corrective Action:

Perform reclamation in accordance to COGCC 1000 series reclamation rules and requirements, and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture provided by the local NRCS or a seed mixture requested by the landowner. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 3/15/2017

Date **03/15/2017**
