Comment: The access road and location have not been recontoured and reclaimed. There is erosion issues along the access road and a culvert remains. There is an estimated 200 ft. unstable cut slope. The fill slope is unstable and has erosion issues. See Attached Photos
The corrective action of the previous inspection has not been performed.

Corrective Action:

Date **07/17/2019**

Comply with 1004 Rules.
Recontour and reclaim the access road and location.

Overall Final Reclamation

Fail

Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment

User

Date

Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed
