## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	impacts 7.5-10' bgs	laboratory analytical results

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A geoprobe was utilized to advance a soil boring at the center of the former partially-buried produced water vessel to approximately 15 feet below ground surface (bgs). Increased moisture content was observed within the boring so a temporary 1' monitoring well was installed. No groundwater was observed during assessment activities, therefore, an additional soil sample was collected and submitted for laboratory analysis.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

A geoprobe will be utilized to advance additional soil borings around the former partially-buried produced water vessel location to determine lateral and vertical extent of historical soil impacts. Four proposed soil borings are presented in Figure 1 attached. Additional step out soil borings will be advanced if required to laterally define soil impacts. A grab soil sample will be collected from the unsaturated interval exhibiting the highest photoionization detector (PID) reading from each soil boring. Each soil sample will be analyzed for BTEX, DRO, GRO, and RRO.

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during soil boring advancement activities, a 1" polyvinyl chloride (PVC) temporary monitoring well will be installed and a groundwater sample will be collected. The groundwater sample will be submitted for laboratory analysis of BTEX.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

A geoprobe will be utilized to determine the lateral and vertical extents of soil impacts at the site. The source removal remedial action will be determined based on soil/groundwater laboratory analytical results and depths of impacts.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation action plan summary will be developed following receipt of sampling analysis results from additional soil assessment activities and once soil impacts are defined.
