Comment

Corrective actions from October 2018 inspection are not sufficiently addressed. Some of the Canada thistles within the project area appear to be partially treated with herbicide. It is not apparent whether this treatment is sufficient to cause mortality of the thistles. Additionally approximately 500 additional Canada thistles that are not treated are thriving within the southern project area.

Corrective Action

Control weeds. Corrective action date is back-dated to document original corrective action date.
