| Comment  | Approximately 50 musk thistles and 200 Russian knapweed identified within the project area. Revegetation is progressing in portions of the interim reclamation area, and remains sparse/weedy in other portions. This needs to be monitored and managed.  |
| Corrective Action  | Control weeds. Musk thistles in flowering condition need to be cut, bagged, and properly disposed of no later than August 2, 2019, to prevent seed dispersal. Thistle rosettes and other weeds (ie R. knapweed) need to be controlled by August 23, 2019. |
