Comment:

	<p>Previous inspection documented that crop establishment on location is not reflective of the reference, and subsidence issues at the well. Inspection required operator to determine issues on the location hindering reclamation, address subsidence, and to conduct additional reclamation.</p> <p>Unable to find evidence that corrective actions have been addressed; subsidence remains evident. Crop establishment is stunted on the location and not reflective of the reference area. Original corrective action and date remains applicable.</p>	
Corrective Action:	<p>Perform reclamation on location in accordance to COGCC 1000 series standards and requirements. To allow time for operator to 1) Collaborate with the surface owner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities, or crop production, and 2) to allow operator time to perform any needed tests to determine the issues on location that are hindering reclamation, all reclamation activities will be conducted by 8/15/2018</p>	Date 08/15/2018
