Comment

Operator appears to have conducted interim reclamation on areas not needed for production.

Vegetation over interim areas appear to have sufficiently stabilized the soils; Original perimeter stormwater ditch, sediment traps, BMPs etc... no longer appear to be necessary and require reclamation.

Large areas of the pad have been left bare. Areas of water ponding evident on pad (see stormwater) as well has vehicle tracking. Bare production areas require stabilization.

Corrective Action

Conduct stabilization activities on pad per 1003.b. Reclaim the stormwater ditch, and associated stormwater BMPs located on the perimeter of the initial disturbance area and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.

Overall Final Reclamation _____

Well Release on Active Location ☐

Multi-Well Location ☐

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Ditches						Perimeter of disturbance. Requires reclamation
Sediment Traps	Fail					Perimeter of disturbance. Requires reclamation
Ditches	In Process					Ditch @ pad perimeter
Waddles	Fail					Straw wattles @ traps. Debris. Requires removal

Comment: Stormwater ponding evident on unstabilized areas of the location. There does not appear to be sufficient stormwater controls with a stabilized outlet to mitigate ponding on the location, and to allow for sediment laden free stormwater discharge from the location in accordance with 1002.f and 1002.f.(3)

Corrective Action: Install stormwater BMPs to 1) mitigate ponding within the pad/production areas, 2) prevent potential industrial pollutant contact and 3) to allow for sediment laden-free stormwater discharge from the location

Date: 08/23/2019

Pits: ☐ NO SURFACE INDICATION OF PIT
