

## BRADENHEAD TEST REPORT

Step 1. Record all tubing and casing pressures as found. Step 2. Sample now. If intermediate or surface casing pressure > 25 psi. In sensitive areas, 1 psi.  
Step 3. Conduct Bradenhead test. Step 4. Conduct intermediate casing test. Step 5. Send report to BLM within 3 days and to OGCC within 10 days. Include wellbore diagram if not previously submitted or if wellbore configuration has changed since prior program. Attach gas and liquid analyses if sampled.

Comments: Initial bradenhead test performed on the Linnebur #1 as required per adoption of COGCC new rule to test all wells located in Adams County. Well is a dual completion of D Sand and J Sand. Both are open to the wellbore but Formation selection would not allow both to be used.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
