Lubauer Petroleum Company
1917 E. Washington Street
Phoenix, Arizona

Gentlemen:

We are returning unsigned your Notices of Intention to Drill the #46, #47, and #48 Lubauer wells.

Before we can approve these notices to drill, more information is needed, namely:

1. Wells #47 and #48 appear to be in the same location, namely - 1200 feet from the south section line and 2900 feet from the east section line of Section 3, T-1N, R-102W.
2. Is well #47 located in Lot 13? The marking over of the quarter quarter description makes this illegible.
3. If well #48 is in Lot 12, then the 2900 feet cannot be measured from the east section line.
4. Are wells #47 and #48 two separate and distinct well locations?
5. The location of well #46 should be in the NE NE NE of Section 2 if the footage of 100 feet from the north section line and 200 feet from the east section line is correct - or is there a Lot 19 in the SW SW of Section 2, and if so, where is the 100 feet and the 200 feet measured from?

If you feel that the above can be more easily and accurately clarified by re-filing the Intentions to Drill for wells #46, #47, and #48,
