**DRILLING COMPLETION REPORT**

Per Rule 308A, this form and all required attachments shall be submitted after completing the drilling operations to drill, sidetrack, or deepen a wellbore and after changing the casing and/or cement configuration of a wellbore. If any attempt has been made to test, complete, or produce the well, the operator shall also submit a Form 5A (Completed Interval Report) per Rule 308B. If the well has been plugged, the operator shall also submit a Form 6 (Well Abandonment Report) per Rule 311.

NIOBRARA	6,040		NO	NO	

## Operator Comments:

Please delete neutron log (document number 400778860) from the Well Logs Upload tab as I am unable to do so due to website issues.

- Conductor was not set as originally permitted.
- PBTD is taken from the float collar set depth
- Please utilize the "Casing" tab for actual depths as sources reference different datums, which result in a different depth.
- Vendor unable to locate production cement PJR, therefore, the invoice/field ticket showing well name, casing string and cement volume is attached.
- A CBL was not run during drilling operations; however, was run prior to commencement of completion operations, and, is submitted herewith.0)
- Per rule 317.p., a resistivity log was run on this well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
