#1 Tetsell C. NW NE 3 8N 53W 6th  
(Well No.) (Lease) (1/4 Sec.) (Sec.) (Twp.) (Range) (Meridian)

The Well is located 660 Ft. ~~(N)~~ of Section Line and 1980 Ft. ~~(E)~~ of  
(S) (W)

Section Line.

The elevation above sea level is / To be furnished later. Ft.

Details of Plan of Work: (State names of and expected depths to objective sands.  
Show sizes, weights, and length of proposed casings; indicate mudding jobs, cementing  
points, and all other important proposed work.)

We propose to drill a well using rotary tools on the above described location to be  
known as Tetsell #1.

It is estimated that approximately 150' of 8-5/8" 8RT, H-40, 32.75#/ft. surface pipe  
will be run and cemented to the surface. The well will be drilled to the "J" sand of  
the Dakota formation, which is expected at approximately 5000 feet.

If commercial production is encountered, a production string consisting of 5-1/2" OD  
8RT, J-55, 14#/ft. casing will be set through the producing formation and cemented with  
150 sacks of cement. The production zone will then be perforated.
